

How to Maintain your **KIN** "Earth Bucket"

Now that you have built your "Earth Bucket" all you need to do is:

- 🌿 Place bucket where it gets sun
- 🌿 Pour water into PVC pipe (if pipe is touching the bottom of the bucket, lift up slightly while pouring water) until water starts coming out of small hole on the side of the bucket
- 🌿 Check the water level every few days; when it needs it, add water
- 🌿 Watch it grow, harvest and eat your vegetables or fruit!

Once you are done using your Earth Bucket, please do not throw it away! Please deliver to KIN at 2806 Gresham Lake Rd. Raleigh, NC 27615. If the office is closed, just leave them by the front door. We can always find it a new home!!
